

IDH Indica Dominant Hybrid **THC:** 30% - 32%

70% Indica / 30% Sativa

Bubblegum Sherb, also known as "Bubblegum Sherbet," "Bubblegum Sherbert" or "Bubble Gum Sherb," is an indica dominant hybrid strain (70% indica/30% sativa) created through crossing the tasty Bubblegum X Sunset Sherbet strains. This tasty bud brings on a soothing, tingly high with a delicious flavor that will have you coming back for more again and again. The high will begin almost as soon as you exhale, filling your mind with a tingly sense of euphoria that appears behind the eyes before spreading throughout the rest of your mind. This tingle will lift the spirits and infuse you with a happy sense of euphoria that numbs the brain a bit and leaves you a bit out of touch with reality. The tingle will then begin to spread throughout the rest of your body, eventually locking you down into a heavy stone and leaving you ready to fall asleep. In combination with its insanely high 30-32% average THC level, these effects give Bubblegum Sherb an edge in treating chronic stress or anxiety, chronic pain, arthritis, inflammation and insomnia. This bud has a sweet and fruity bubblegum flavor with a sour and citrusy lemon aroma to go along with it.

Bubblegum Sherb buds have oversized and fluffy, spade-shaped dark olive green nugs with bright purple undertones, thick neon orange hairs and a sparkling, frosty blanket of chunky, vibrantly purple-tinted white crystal trichomes.
