

The most predominant flavor profile you will find is blueberry smoothie but there are also strong elements of candy and gas. Extremely vigorous plants that root and veg quickly and in flower they produce massive baseball bat sized colas. This is a collab with Mario Guzman from Sherbinski's and Voice of the Plant. Some phenos lean more heavily towards the blueberry smoothie side of things while others are less candy and more panties. Candy Panties is ideal in commercial cultivations because she throws down on yield for both flower and hash (typical return is 5% to hash and just over 4% to rosin).
