

IDH Indica Dominant Hybrid **THC:** 18% - 21%

55% Indica / 45% Sativa

FPOG is an indica dominant hybrid (55% indica/45% sativa) created by breeders at the infamous Alien Genetics cannabis farms. This dank bud is a cross between the hugely popular Green Ribbon X Granddaddy Purple X Tahoe OG X Alien Kush strains and boasts a moderate THC level that ranges from 18-21% on average. FPOG first gained popularity in SoCal in 2006 when it was first introduced and since then has become one of the most popular strains on the market. Users describe the FPOG high as one that starts as a soft strong body buzz that is mind-relieving and spacey followed by a mild couch-lock. It's cloudy, slowing things down around you, but still leaves you with a hugely energetic high in which you are relaxed, friendly, and lethargic, but still functional if you want to be. FPOG is ideal for patients who suffer from conditions such as chronic pain and mood disorders, due to its relaxing body buzz and uplifting cerebral high. This bud tastes exactly like a bowl of FPOG, a sweet, tropical berry, and smells just as good! The nugs are a light minty green with a fluffy body and a blanket of resin and crystals. The most interesting feature is the coloration of the hairs that are woven through the bud – they're a rainbow fusion of reds, purples, yellows, and oranges!
